

Report on installed Stainless Steel Dustbins at Gnaga Ghat, Varanasi

Background:

Varanasi is known as the city of Ghats and temples. There are 84 ghats on the bank of holy river Ganga. For cleaning of all 84 ghats National Mission for Clean Ganga (NMCG), IL&FS Environment and Varanasi Nagar Nigam (VNN) jointly entered into an agreement for the period of 3 years.

Status of the Project:

Project was started on 24th Se. 2016. However, tripartite concession agreement was signed on 17th Oct.2016 among NMCG, IL&FS Environment and VNN for the period of 3 years. Scope of work includes regular sweeping, washing of ghats and waste collection and transportation from ghats, etc.

Physical Progress:

Sufficient number of Man and machinery were deployed at the commissioning of the project. The big challenge on ghats was to store the waste generated by devotees and local vendors. To overcome this challenge 70 nos. Stainless Steel dustbins were provided by IL&FS Technologies Ltd. through Nalanda Foundation.

Installation of dustbins:

These bins were installed at Raj Ghat, Prahalad Ghat, Dashswamedh Ghat, Shitala Ghat, Tulsi Ghat, Raja Ghat, Shivala Ghat, Man Mandir Ghat, Meer Ghat, Ganga Mahal Ghat etc.
